Washington's Lottery requires all retailers to certify that they comply with state and federal laws prohibiting discrimination against persons with disabilities. All Lottery products and services must be accessible to persons with disabilities. The items listed below are the major components of the accessibility requirements and have been developed to assist existing and prospective Lottery retailers in assessing their facilities for compliance with state and federal accessibility requirements for those portions of their facilities necessary for the sale of Lottery products. A retailer should not assume that compliance with the following provisions, acceptance of the completed forms by the Lottery, or approval of a facility as a retailer ensures that a facility complies with state and/or federal requirements. If you believe you need to make changes in your business to satisfy these requirements, or if you want more detailed information, please consult with your attorney.
